## EDUCATION

### B.Tech in Computer Science and Engineering

Dr.MGR Educational and Research Institute, Chennai, India

Jun 2021 - May 2025

## TECHNICAL SKILLS

|                            |                                                                                                                                                                               |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Programming / Scripting:   | Python, Bash, PowerShell                                                                                                                                                      |
| Security Tools:            | Burp Suite, Nmap, Metasploit, Wireshark                                                                                                                                       |
| Operating Systems:         | Linux (Kali, Ubuntu, ParrotOS), Windows Server                                                                                                                                |
| Core Security Concepts:    | Vulnerability Assessment, Penetration Testing, Incident Response, OSINT                                                                                                       |
| Active Directory Security: | Active Directory Enumeration, Privilege Escalation, Lateral Movement, Trust Exploitation, Persistence Techniques, Kerberos Attack, Group Policy Abuse, Anti-virus/EDR Evasion |

## EXPERIENCE

### CTF Player - Null Ninjas

Jan 2024 - Present

- Ranked in the Top 10 internationally in multiple Capture the Flag competitions.
- Placed 13th in Yukthi CTF (in association with Tamil Nadu Cybercrime Department).
- Developed skills in scripting, open source intelligence, and system security.

### Pentesting Intern - HACKTIFY Cybersecurity

Feb 2024 - Mar 2024

- Completed penetration testing internship under Dr. Rohit Gautam.
- Gained hands-on experience in web app testing, vulnerability analysis, and report writing.

### Machine Learning Intern - Vcodez Solutions Pvt. Ltd.

Apr 2025 – Jul 2025

- Trained in **Python**, machine learning algorithms, and data handling techniques using **NumPy**, **Pandas**, and **scikit-learn**.
- Built ML prototypes and prepared them for integration into live systems with **Streamlit** for UI.

## CERTIFICATIONS

- Certified Red Team Professional (CRTP)** - Altered Security | [View Certificate](#)
- Python for Data Science** - Indian Institute of Technology Madras | [View Certificate](#)

## PROJECTS

### Blockchain-Based E-Voting System - [[GitHub](#)]

- Designed and deployed secure voting smart contracts using Solidity on the **Ethereum blockchain** via **Remix IDE**, ensuring transparency and tamper-proof elections.
- Built a responsive frontend with **HTML**, **CSS**, and **JavaScript** for intuitive user interaction with the decentralized system.
- Integrated **MetaMask** wallet authentication for secure voter participation and blockchain interactions.
- 

### Port Scanner - [[GitHub](#)]

- Developed a multi-threaded **Python** tool for scanning TCP ports, grabbing banners (including SSL/TLS), and identifying common services with protocol-specific payloads.
- Optimized performance using concurrent futures and threading, with clean output of key service headers (e.g., Server, Date, Content-Type).

### Electronic Arts Software Engineering Virtual Experience - [[Forage](#)]

- Proposed a new feature for **EA Sports College Football** and documented it in a formal Feature Proposal for stakeholders.
- Designed a **C++** class diagram and implemented class definitions in a header file.
- Patched a bug and optimized part of the codebase by introducing a more efficient data structure.
